

Maxi-KREME

Maxi-KREME asphalt release agent is a proprietary blend of heat resistant, environmentally friendly and biodegradable oils. A proprietary blend of surfactants is installed to allow the product to be blended with water if desired. Common ratio for bed release will range from 5:1 to 30:1. Paving machines and tools may require full strength use; operators can experiment to find what works best for their application. This unique formula creates a heat resistant, NON stick barrier on truck beds, paving equipment and tool surfaces.

Maxi-KREME is a **100% biodegradable, non-petroleum based** asphalt release agent that will help users meet regulatory compliance goals without sacrificing performance. It is a great alternative to diesel with out affecting the quality of the asphalt. It's extremely effective on cold or hot metals in a variety of weather conditions and Asphalt mixes.

Maxi-KREME is an effective release agent for polymer asphalt mixes. It's more effective than diesel fuel, detergent, or pine and citrus-based products

In the shop and repair area **Maxi-KREME** can be used in concentrated form for cleaning asphalt equipment and tools.

Using **Maxi-KREME** reduces risk and improves worksite safety. It uses no phosphates, acids or distillates, and is not regulated under dangerous materials. It has no special handling requirements, no carcinogens or hidden toxins.
